June 18, 2009 - Fully integrated within our Operational Excellence (OpX) framework, DEW's Quality Management System, in conjunction with our Lean Six Sigma initiatives, ensures that our resources are aligned with providing exceptional value and satisfaction for our customers. DEW Engineering's strong customer focus is supported by strong senior management leadership, commitment and involvement. DEW Engineering, Registered since 1995, has recently been successfully recommended for Registration by UL DQS to the requirements of ISO 9001:2008. DEW Engineering's Scope of Registration has no exclusions and covers both of our facilities as well as all aspects of our business. DEW's assessed scope covers, amongst other things, the design, manufacture and refurbishment of military vehicles and support equipment, vehicle armour systems and industrial material handling vehicles as well as the development and publishing of technical publications.
